

Tomato

Did you know?

Tomatoes are actually a fruit! Tomatoes have seeds and grow from flowers, which makes them a fruit. There are over 7,500 different kinds of tomatoes, and not all of them are red. Some can be green, yellow, pink, black, purple, and even white!

Every year, in the small Spanish town of Buñol, there is a festival called La Tomatina where people have the biggest tomato fight. 40,000 people come together to throw more than 150,000 tomatoes at each other!
