

# Zucchini

## Did you know?

Even though many people call zucchinis a vegetable, they are actually a fruit. All zucchinis are squash, but not all squash are zucchinis. Another type of squash is a pumpkin, which means zucchinis and pumpkins are basically cousins! The world's largest zucchini weighed 65 lbs! Bigger is not better though. The best tasting zucchinis are the small to medium-sized ones.

The flower of the zucchini plant is edible, and it's considered a delicacy in Italy!
